Folia can only run plugins that are made for Folia. Plugins that were designed for Paper will not work and will require modifications by the author. Towny supports Folia, but to my knowledge

Unlike the Bukkit schedulers, Folia's GlobalRegionScheduler will not be ticked while the server is paused. If you ran a Spigot 1.21.3 server before switching back to Paper, we recommend

Hello and good time, can you share with me information about the installation and run the new paper fork, Foila (on wondows server)? I need it badly

Once again, we have another exciting announcement for you, this time about PaperMC's own site for uploading and downloading Paper, Velocity, and Waterfall plugins, called Hangar! The

? Worlds - The Ultimate World Management Plugin for Paper & Folia Worlds is a modern, lightweight world management plugin designed for Paper and Folia servers. It brings seamless world

hi, please update folia to version 1.12 we really want to plat the new update...

I tried building manually Folia 1.21, I built a weird version it still use minecraft 1.20.6 but its api is 1.21. I don't konw what lead to this.

I'm looking to add support for Folia in one of my plugins, and the last roadblock I have is taking input from players. The input will typically be long. In my spigot version, I use the conversation

To make your plugins "work" on Folia you need to append "folia-supported: true" to the plugin.yml. To then actually make your plugin work you will probably have to make some changes.
